

CHIVES

Allium

Fuyuyo - Grows very well in cool weather. Suitable for autumn / winter crops. Slender green leaves and short white stalks are very tender. Excellent for raw eating. Easy to grow.

Natsuyo – Suitable for growing in summer and warm seasons. Resistant to disease especially downy mildew. Green slender bunching onion. Raw eating.

New Belt – Dark green, thick flat leaves up to 10mm in width. Resistant to disease. Widely used in Chinese dishes.
