

MARJORAM SWEET

Origanum Marjorana

- Grows to 60cm high
- Leaves are light green on top and grey green underneath
- During summer Marjoram will produce white to lilac flowers in clusters (knots)
- Grows in warmer zones, will not survive cold winters or frosts
- Prefers full sunlight
- This plant requires a rich soil containing plenty of compost
- Is very slow to germinate
- Plant in small clumps 15cm apart
- Water adequately but do not overwater
- Additional fertiliser is needed in well mulched soil
- Pick young leaves anytime

Approximately 750 seeds per gram
