

RHUBARB GLASKINS PERPETUAL *Rheum Rhabarbaum*

- Grows between 150 – 200 cm high
- Good forcing strain with slender, bright red stems
- Good flavour over a long period
- Excellent for tarts, pies, jam and wine
- Very easy to grow
- Sow seeds in early spring deep in 7.5 cm pots with free draining compost, keep compost moist
- Plant out seedlings late spring
- Germination is usually between 21 – 41 days at 20 – 25c
- Once planted do not move them
- Water in dry weather and top dress around the crowns with a well rooted compost
- In the second year a light picking can be made, always leave at least four leaves on the plant
