

ROCKET

Diplotaxis

Olivetta – Has deep green serrated foliage. This variety has a stronger flavour than to normal Rocket. Easy to grow. Young leaves are perfect for salads. Sow thinly 1cm deep and 30cm apart in soil that has been raked. When large enough to handle thin seedlings to 23 – 30cm apart. This variety is slow growing. Harvest leaves as required. Prefers moist, well drained soil in full sun.

Aprox. 4,000 seeds per gram
