

Family owned and operated since 1976

ROSELLA *Hibiscus*

- This variety is an annual shrub with large lobed red leaves and has hibiscus like flowers
- Prefers warmer climates
- Rosella can be easy to grow
- This variety prefers most soil types as long as they are rich and well drained
- To maintain growth plenty of water is required
- The fruits are ready to be picked approximately three weeks after flowering
- Rosella needs approximately 5 months frost free before planting
- Rosella needs a warm soil to germinate
- In cooler regions rosella should be started indoors, in warmer regions you may start sowing in early spring
