

*Family owned and operated since 1976*

## **TOMATO TROPIC** *Lycopersicon*

- Indeterminate
- Matures medium to late
- Red oblate fruits
- Skin in smooth and firm
- This variety is specially recommended for tropical production
- 7 – 14 days for germination.
- Plant in spring.
- Requires plenty of sunlight.
- Each year relocate your tomato plants in different parts of your garden to avoid diseases.
- Requires fertile slightly acid soil in a well drained location in the garden. Apply mulch, grass clippings or straw around base of plant.
- Harvest tomatoes when they are fully mature.
- Pick the fruit as they mature to encourage new fruit to form.

Approximately 392 seeds per gram
