

## **VIOLA**

### **Queen Charlotte**

Viola Queen Charlotte is a spring flowering bedding plant that copes with a wide range of soil types. Once it is established this variety can cope with being neglected.

Queen Charlotte has sweetly scented dark blue / purple flowers on 10cm long stems and is great for ground cover. Grows to reach 20cm.

This variety is a cold germinator and requires chilling to break its dormancy. This variety is best grown in autumn.

Germinate at 15 -18 degrees, 21 – 35 days.

This variety requires full sun to partial shade

Approx: 250 seeds per gram
